

## VW Video Script

*Instructions: In an effort to keep the videos short and to create variety, we have provided a few options of different points to include.*

- I am calling on VW to FULLY exit the Uyghur Region. A recent report found that VW has more supply chain exposures to the Uyghur Region than any other auto brand! In a Region where, over 1 million Uyghurs and other Turkic and Muslim majority peoples have been rounded up in detention and forced labour camps by the Government of China.

### Options to include:

1. VW sources things like raw materials and manufactured parts including steel, aluminum, batteries, and electronics that may be made with Uyghur forced labour.
  2. VW still operates a plant in Urumchi, the capital of the Uyghur Region. VW has refused to shut down the plant despite repeated calls from Uyghur groups to close the facility AND even though the facility is no longer manufacturing cars.
  3. VW is at a HIGH RISK of profiting from Uyghur forced labour.
- We need as many people as possible calling out VW and demanding they take action to end Uyghur forced labour TODAY.
  - Join us in demanding VW:
    1. Apply a single global standard in line with the requirements of the Uyghur Forced Labor Prevention Act.
    2. Shut down its plant in Urumchi.
    3. Cut ties with companies linked to Uyghur forced labour AND fully exit the Region.

### Ending options:

1. When will VW take action on Uyghur forced labour?
2. How is VW going to end Uyghur forced labour?
3. What will it take for VW to take the egregious human rights abuses against Uyghurs seriously?
